

HG1390S

Hi-Visibility, Cup Heel Grounder

Heel grounders provide ESD grounding protection for staff on the move.

The HG1390S is constructed from durable materials and features a classic hi-visibility yellow/green hook & loop closure with an elastic insert to maximize fit and comfort.

These heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Meets or exceeds requirements of ANSI ESD-S20.20.

Features

- Elastic Hook and Loop Closure
- Buried 1 Meg Resistor for Safety
- Stretch Hook and Loop Closure Strap Allows Maximum Fit and Comfort
- Available in a Bright Yellow/Green with 1.25" Black Rubber Heel Cup

Specifications:

Resistor: 1 meg ohm (+/- 5% tolerance), buried

Color: Yellow/Green hook and loop, Elastic Black/White rubber

Rubber Exterior: $10e5$ ohms, 1.25" wide, cup

Ribbon: Conductive yarn in gray polyester ribbon

Part Numbers:

HG1390S: Heel Grounder, Elastic Hook and loop, 1 meg

Applications:

Heel grounders provide a path-to-ground for personnel that must be mobile. They must be used in conjunction with an ESD floor or mat.
