

WB8000 Series

Elastic, Adjustable Wrist Strap Set

Description

The fully adjustable 8000 series wrist band and coil cord set from Transforming Technologies features an elastic adjustable band with a unique locking clasp that eliminates excess wrist band material.

The band is standard with 4mm machined male snap. The 2.5mm polyurethane coil insulation offers excellent coil memory. A shorter, swivel type banana jack increases coil life, prevents cord tangles and fits most bench grounds.

The soft, blue woven fabric of the wrist band allows the skin to breathe and is very comfortable to wear. It uses highly conductive copper sulfide thread for conductivity and it has a maximum resistance of 160 ohms.
