

CLEANROOM TACKY MATS

CTM1000 SERIES

Stop dirt contamination with cleanroom tacky mats that remove particulates from shoes and cart wheels before entering your controlled environment.

Tacky mats are used at the entry and exits of cleanrooms and lab controlled environments to remove contamination on shoes and wheels of carts. Each tacky mat consists of a stack of numbered tear-off polyethylene film sheets. When a sheet becomes loaded with contamination, it is peeled off, exposing a new clean sheet for use. This peel-off design eliminates messy and time-consuming cleaning.

Our tacky mats are made with LDPE (Low Density Polyethylene) which creates a smooth surfaces that is not damaged by shoes, booties or cart wheels. Our mats are a dependable solutions for use in semiconductor, food industry, aerospace, laboratories, surgery rooms and other controlled environments.

The mats consist of 30 numbered sheets per mat and 4 mats per case.

Frames are also available to assist with installation.

Applications:

Cleanroom tacky mats are common place at the entry and exits of cleanrooms and lab controlled environments. Tacky mats are a low cost solution for trapping
